OPERA II ~ V4.00.00

We have now distributed Opera II v4.00.00 to all of our Opera postal contract scheme customers, and arranged site visits for non-payroll customers where we carry out their installations.

If you have not received the new version, or arranged a site visit to upgrade your system, please call Support Department to advise them of the situation.

The release is essentially identical to the latest payroll upgrade (v3.10.) plus some service release amendments. It has been provided to enable the introduction of a further variant ~ SQL. [Opera II SBS, Enterprise and SQL are all now available and provide scalable options depending on the size of your business.]

IRIS ENTERPRISE ~ V5.61.001

We have issued upgrades for all postal contracts or arranged site visits for those customers where we undertake the upgrades on their behalf.

If you have not received the new version, or arranged a site visit to upgrade your system, please call Support Department to advise them of the situation.

IRIS ENTERPRISE ~ INCREASING SYSTEM PERFORMANCE

If system is slow due to large data file sizes, at the end of your financial year create a copy of the company. You can then purge from the live company reducing file size and increasing performance but retaining history that can be viewed in the copy company.

All the recommended criteria should be met before purging from the live company. Please refer to help files for further information.

OPERA 16 ~ V3.31.00

Pegasus has released a new service update version for Opera. This is almost identical to the Payroll version (v3.30.00) and accordingly we will only be providing this release to customers on v3.28.00 or earlier. Distribution is expected to commence on 12 July for postal contracts, or we will be contacting you direct if we install upgrades on your behalf.

If you have not received your copy by 15 July, or arranged a site visit, please call Support Department to advise them of the situation.

OPERA ~ PERIOD END, N/L TRANSFER & RECONCILIATION

We have produced a paper detailing the process of transferring data to the Nominal Ledger and when records are posted to Sales or Purchase ledgers.

Additionally we have shown how to reconcile your Aged Creditors or Aged Debtors to the respective Nominal Control Accounts.

For further details ([click here](#)).

OPERA II ~ FIXED ASSETS

We are advised that Pegasus have taken the decision not to develop a Fixed Assets solution for Opera II.

However, we are pleased to be able to provide you with an alternative solution, designed to meet the needs of those companies that have an asset management requirement ~ KC Fixed Assets, produced by Kamarin Computers.

Kamarin Computers were established in 1981, and specialise in producing software solutions for small to medium size enterprises. We have used Kamarin software for the benefit of a number of our Opera and Opera II customers (and for our own in-house software).

KC Fixed Assets solution integrates fully with Opera II and incorporates the Opera II look and feel. For further details, please contact your Account Manager on 01206 711 451.

ORDERING A NEW PRINTER?

A number of our customers have recently obtained new printers, and then found that these are not compatible with their software packages.

If you are in doubt regarding which drivers/ printers will work with your software, please contact Software Support Department for assistance ~ ordering incompatible hardware can prove more expensive in the longer run.

Should it be necessary, we will be willing to supply, inspect, and install your printers, set them up with an appropriate driver and test on your network.

STOP IT!

We hope that you find our e-mailed information sheets of direct help to you and your business. However, should you wish to remove your name from the mailing list or make changes regarding recipients, please contact John Stannard, Support Department.
